There are seven categories of Cost Recovery connections:

1. Meter Damage
2. Re connection
3. Phase change (1-30, 3-30)
4. Phase change (1-30, 3-60)
5. Other
6. Conversion Only (3-30, 3-60)
7. Property damage

Cost recovery process is also similar to new connection process. Just like the new connection process we can divide cost recovery process into three major phases.

### Application

Here sequentially you add new application, in the new application form you have to select the job sub type and you have to select yes or no to [Is visiting needed](#). Finally save the application and generate an application no.

Note: Here PIV1 is irrelevant. New customer addition is same as in the new connections (If the customer is previously registered no need to re-enter as a new customer), if you entered meter damage as sub type in new estimation you have to select meter damage as your new estimation. If you entered phase change or other type you will not be able to select your application no. the application no only shows in the relevant type.

## New Estimate

Here sequentially you create an appointment, Print service estimate, Save Service Estimate data, create a new estimate, Send it for approval, Issue PIV after approval received, Confirm PIV after payment and finally create a new job for the application.

## New job

After new job is created you may allocate the job to a contractor, Revise the job if necessary, Energize the Job/SMC card, Prepare contractor bill for finished job and send billing data and then job should be soft closed by AE and then the Job is hard closed by Accountant.

Application Sub Type: Choose accordingly by clicking whether it is Meter Damage, Re Connection, phase change etc.

Is Visiting Needed: Choose from the drop down box whether site needs to be visited. And enter allocated to whom.

Existing Acc. No: Enter the customer account number if he already has a one.

Fill rest of the application as the Cost recovery new application and click save button, new application no will be shown at the right upper corner of the form. Ex: **514.20/ECR/13/0166**

Any necessary modifications for an application can be done by clicking [Application](#) ► [Application](#) ► [Modify Application](#) from the main menu.

Note: If you entered visiting is not needed in the application form then the application will straightly go to new estimate.

## How to create an appointment?

Adding an appointment is same as in new connections. Click [Schedule](#) ► [Appointment](#) ► [New Appointment](#) to navigate to the New Appointment form.

## How to Print a Service Estimate?

After appointment created ES can print the service estimate. Creating a Service estimate is same as in new connections. Click [Schedule](#) ► [service Estimate](#) and you will be directed to Service Estimate creation page.

## How to Create a Service Estimate?

After ES visited the customer place he has the previously printed service estimate filled. Click [Schedule](#) ► [service Estimate](#) and you will be directed to Service Estimate creation page. You may enter service estimate details there just like the new connections.

## How to Create a New Estimate?

After the service estimate is created you can add a new estimate. Click [Estimation](#) ► [Estimate](#) ► [New](#) ► [Meter Damage, Phase change, other etc](#) from the Main Menu. Creating the new estimate is similar to the new connections.

Note: when creating a new estimate you should select the correct cost recovery option from the menu as same as the option you selected on the new application form application sub type. Otherwise the application no you generated will not be shown in the application number drop down list.

Ex: if you entered meter damage in the application form you should select the meter damage from the new estimate also.

## How to Approve/Recommend /Reject an Estimate?

At notification dashboard at Home page you will be shown a table called Estimates to be approved. Click Estimate No link and you will be directed to the relevant estimate.

There after rechecking the estimate you can use the Approve button below. If the estimate is within your approve limit it will be approved or else it will be sent to the next above approve level to be approved.

By clicking the Recommend button estimate will be sent to the next above approve level to be approved.

You can also click Reject if there are any errors. If you are rejecting an Estimate you need to enter a reason at Reason to reject text field.

Note:

You can also click [Estimate](#) ► [Estimation](#) ► [Approve/Reject](#) from the main menu and go to the Estimate view.

There select the estimate number you need to approve or reject using the Estimation number drop down box.

This is the same process as new connections.

## How to Issue PIV?

At notification dashboard at Home page you will be shown a table called Approved Estimates.
